

Tube strippers

Automatic Tube stripper TS08

Features

- New and redesigned tube holder for beater tube guidance
- Designed for right and left hand use
- Low weight for easy handling
- Swift and complete stripping of blood bag tubes
- Ideal for all commercial blood bag systems on the market
- Automatically centered tubing fed through pair of rollers by a guidance system
- Preventing coagulation of blood in tubing prior to preparing segments
- Changeable stripping speed on power supply
- Power supply with stabilized output, low ripple & low interference, Short circuit & overload protection
- High efficiency and low energy consumption

General technical data

Overall dimensions (handle closed)	75 x 57 x 195 mm
Overall dimensions (handle open)	110 x 57 x 195 mm
Max stripping tube diameter	6.5 mm
Stripping wheel diameter	32.5 mm
Stripping wheels angle opening	25 deg
Tube stripper body diameter	40 mm
Max stripping speed	400 mm/sec
Weight without power supply	~800 g
Operating temperature	+10 – +40 °C
Storage and transport temperature	-20 – +50 °C
Power supply voltage	100-240 V AC
Input frequency	50 Hz / 60 Hz
DC motor supply voltage	6-15 V / 1.5 V step
