

LD Medical Thermal Bag Range

Our LD Medical-thermal range of thermal transportation bags are made using a specially designed insulation material. They have been extensively tested by an independent UK testing company (based in Cambridge) which have issued us with certificates/test reports confirming that our range of thermal vaccine bags help keep chilled products at critical temperatures for extended periods of time, without the need for continuous refrigeration.

Gel Packs

- Can be used in conjunction with the thermal bag range to increase cold life.

Code	Product
8410	1 Litre Gel Packs (sold in 10s)
